

RESILIENCE 2011

Resilience, Innovation, and Sustainability: Navigating the Complexities of Global Change

Second International Science and Policy Conference, Tempe, Arizona, USA

Arizona State University will host Resilience 2011, an international conference on the dynamics of interconnected social-ecological systems, on March 11-16, 2011. Our aim is to advance understanding of the relationships among resilience, vulnerability, innovation and sustainability with the hope of developing and refining ideas for meeting the challenges of global change.
