Jago Cooper currently runs a Leverhulme funded research project entitled 'The Archaeology of Climate Change in the Caribbean'. This research emerges from an ongoing collaboration with the Cuban Ministry of Science, Technology and Environment focused on developing Cuban archaeology. Jago Cooper originally developed his interests in Latin American Archaeology and applied Archaeological Fieldwork Methods and Techniques whilst studying at the UCL Institute of Archaeology. Jago then worked for the Museum of London Archaeology Service and Wessex Archaeology on CRM projects and rescue excavations around the UK before returning to the Institute of Archaeology UCL to complete his masters and doctoral research. Over the years Jago has worked on a wide range of archaeological and heritage management projects in Australia, Barbados, Belize, Colombia, Cuba, Mexico, Puerto Rico, Spain and Sri Lanka. Jago joined the School of Archaeology and Ancient History at the University of Leicester in 2007 as a Lecturer in archaeology before being awarded his Leverhulme Early Career Fellowship in 2008.
