

Elizabeth J. Reitz

Georgia Museum of Natural History

University of Georgia

Athens, GA 30602

Office tel. 706-542-1464

Email ereitz@uga.edu

Reitz is a zooarchaeologist with research experience in N America, the Caribbean, and South America, but with a major focus on coastal environments in the southeastern United States and Peru throughout the Holocene. Her research focuses on the dynamic interactions among coastal ecosystems, human resource use, climate, and inter-cultural contacts. Major current collaborations are with colleagues in the American Museum of Natural History, the Charleston Museum, the University of Alabama, the University of Southern Alabama, and the Climate Change Institute at the University of Maine. She directs the Georgia Museum of Natural History Zooarchaeology Lab and is graduate coordinator for the Department of Anthropology.
