

SHRIPAD TULJAPURKAR

Professor, Biology Department
454 Herrin Labs
Stanford University
Stanford Ca 94305
650-724-4171

TULJA@STANFORD.EDU

Shripad Tuljapurkar (Tulja) works in demography, theoretical ecology, and evolutionary biology. Much of his work centers on analyzing and forecasting human and animal populations subject to variability in their dynamics. He has worked with Pat Kirch and Peter Vitousek on the Hawai'i Biocomplexity project and has developed methods for modeling the relationships between humans, agriculture and the environment.
