Chapter 1: Introduction: Islands and human impact 1
  Overall aim and objectives 1
  Rationale and overall importance of the research 1
  The importance of an interconnected human-environment approach 2
  The importance of a historical perspective 3
  The importance of an island focus 3
  Scales of research 4
  Thesis structure and summary of research approach 6
  Specific research questions and hypotheses 8
    Specific research questions applicable to the “fundamental issues” (at the scale of global islands) 12
    Site-specific research questions applicable to the Faroe Islands 12
    Research questions applicable to the wider context (at the scale of the North Atlantic islands) 12
  Hypotheses 13
  Chapter summary 13

Chapter 2: Approaches to, and concepts of, human-environment research 15
  Introduction 15
  2.1 Approaches to human-environment research 15
    Human-environment relations and theories 15
      The effect of nature on society and culture: environmental determinism 15
      Nature as a limiting factor to human possibility: Malthus and Darwin 17
      The effect of cultural history on society and culture: Possibilism 18
    Cultural ecology 19
    Historical ecology and temporal and spatial perspectives 19
    A comparative approach 21
    Approaches to human-environment research in the North Atlantic 22
  2.2. Concepts in human-environment research 22
    Environmental change and thresholds 22
    Responses to change 23
Environmental responses: sensitivity and resilience 23
Human responses 25
Adaptation 26
The influence of information, perception, memory and decision making on adaptation 28
Chapter summary 31

Chapter 3: Island contexts 33
Introduction 33
Island contexts as models for human impact and global change 33
Island ecosystems and biogeography 36
Colonisation of remote islands 38
Timing of colonisation 40
Human impacts and environmental change in remote islands 40
Population and resources on remote islands: cultural stress and collapse 42
Population and resources on remote islands: population regulation and sustainability? 46
Inherent sensitivity of island ecosystems 47
Climatic change on islands 48
Summary: a global model of island colonisation and human impact? 49
Chapter summary 50

Chapter 4: North Atlantic context: environmental trajectories and cultural change 51
Introduction 51
Background to North Atlantic research 51
4.1 North Atlantic climate systems 52
North Atlantic pre-colonisation climate trajectories 55
Climate trajectories over the period of settlement 57
Climate–people integration 58
Climate and landforms in the Faroe Islands 59
4.2 North Atlantic environmental context 61
The Faroe Islands 61
Faroe Islands geography and environment 61
Faroe Islands biogeography 64
Iceland 65
Icelandic geography and environment 65
| Icelandic biogeography | 66 |
| 4.3 North Atlantic (Faroe Islands) human context: Overview | 68 |
| 4.4 North Atlantic human context: Colonisation | 70 |
| The Viking expansion | 70 |
| Pre-Norse colonisation of the Faroe Islands | 71 |
| Norse *landnám* in the Faroes | 73 |
| 4.5 North Atlantic human context: Long-term settlement and adaptation | 74 |
| Norse “cultural capital” | 74 |
| Faroese “cultural capital” developments | 76 |
| Faroese settlement patterns in a North Atlantic context | 77 |
| Faroese farming systems in a North Atlantic context | 79 |
| Land and resource ownership in the Faroe Islands in a North Atlantic context | 83 |
| 4.6 Human impacts and environmental change in the North Atlantic islands | 83 |
| Chapter summary | 86 |

Chapter 5: Methodological framework and data collection | 87 |
| Introduction | 87 |
| Methodological framework | 87 |
| Field site selection | 91 |
| *Hov* and *Sandoy, the Faroe Islands* | 91 |
| *Eyjafjallahreppur, Iceland* | 98 |
| Spatial methods | 98 |
| Landscape mapping | 99 |
| Archaeological survey | 102 |
| Settlement and landholding data | 103 |
| Conceptual methods | 107 |
| Interview process | 107 |
| Temporal methods | 109 |
| Stratigraphic sections | 109 |
| Radiocarbon chronology | 110 |
| Chapter summary | 112 |

Chapter 6: Data presentation | 115 |
| Introduction | 115 |
| 6.1. Presentation of spatial data | 115 |
| *Hov*: landscape units and geomorphic features | 115 |
| General summary of *Hov* geomorphology | 115 |
Summary outline of specific geomorphic features
  Box-type gullies
  Small scale gullying
  Inactive fan
  Active fans and river systems

Sandoy: extent of land degradation
General summary of landscape-scaled degradation patterns

6.2. Hov and Sandoy: sites of cultural activity
Extents of archaeological survey in Hov and on Sandoy
General description of archaeological monuments in the Faroese outfields
  Outfield structures relating to sheep and cattle
  Structures relating to peat cutting activity
  Drainage ditches
  Cairns (varðar)

Identification and description of archaeological “zones”
  Hov archaeological zones
  Sandoy archaeological zones
Detailed mapping of torvlutir in central Sandoy

Comparison between cultural zones and land cover classification mapping

6.3. Interview data
Combined summary of interview data
  Peat; methods of extraction, its geographical exploitation and ownership
  Fowling; ownership, methods and geographical exploitation
  The importance of the grind (pilot whale hunt)
  Farming and sheep grazing
  Settlement patterns, social structures and connections
  The impact and significance of weather and climate

6.4. Presentation of temporal data
Detailed descriptions of characteristic profiles
  Detailed description of example profile from Hov (KAM20)
  Detailed description of example profile from Sandoy (KAM 61)
Summary description of Holocene sediment sequences in Hov and Sandoy
Summary description of targeted transects in Hov and Sandoy
  Hov: Transect 1a and 1b (KAM 1-7, 16-18)
  Hov: Transect 2a and 2b (KAM 8-9 and 30, 10-15)
Chapter 7: Discussion: Historical human-environment interactions in the southern Faroe Islands

Introduction

7.1 Historical human-environment interactions in the southern Faroe Islands

7.2 The pre-colonisation landscape of the southern Faroe Islands

Long-term trajectories and thresholds: soil stratigraphic and landform evidence

Hypotheses regarding the timings and causes of thresholds

Environmental thresholds in late Holocene Faroes

Evidence of environmental thresholds in surface landforms

Thresholds and spatial factors in relation to surface cover

Evidence of environmental thresholds in sediment stratigraphies

Timing of thresholds and possible causal relationships

Climatic, ecological and environmental changes coinciding with the timing of Phase 1 (c. 2900 – 2300 cal yr BP)

Climatic, ecological and environmental changes coinciding with the timing of Phases 2a and 2b (c. 1900 – 1300 cal yr BP)

Conclusions: how did pre-colonisation landscape change affect settlement?

7.3 Human impact in the southern Faroe Islands

The impact and geomorphic significance of landnám

The geomorphic significance of post-landnám anthropogenic impact

The significance of long-term grazing impacts

The significance of landscape impact related to resource exploitation

Conclusions: how has human impact affected the Faroese landscape?

7.4. Why might human impact in the Faroes have been limited?

How geography, topography and settlement factors may have influenced environmental and cultural trajectories in the Faroe Islands

How specific resource exploitation strategies may have limited human...
Chapter 8: Discussion: The Faroe Islands and the wider North Atlantic context

Introduction

8.1 The importance of a wider spatial context

8.2 Summary of trajectories and thresholds in the Faroe Islands, Iceland and Greenland

8.3 Comparisons between the Faroe Islands and Iceland

Why are trajectories between the Faroes and Iceland different?

Inherent physical and ecological differences between the Faroe Islands and Iceland

Differences in the utilisation of resources in the Faroe Islands and Iceland, and how these develop over time

Isolation, contact and disease in the Faroe Islands and Iceland

Why might human impacts in the Faroes have been limited? Insights from Iceland

An example from south Iceland: identifying the differences in environmental trajectories between the farms of Mörk and Dalur

An example of contrasting environmental trajectories between adjacent farms in the Mývatnsveit region, north Iceland

8.4. Comparisons between the Faroe Islands and Greenland

Are there comparisons between the environments and subsistence practices and impacts in the Faroe Islands and Norse Greenland?

Similarities between the scale of settlements and population in the Faroe Islands and Greenland

Similarities in the pre-settlement environments of the Faroe Islands and Greenland

A comparison of resource utilisation in the Faroe Islands and Greenland

Why might trajectories in the Faroes and Greenland be different?

Differing patterns of conflict and goals and aspirations between the Greenland and Faroese Norse

To what extent does climate matter with regards to differences in cultural and environmental trajectories in the North Atlantic?
When climate doesn’t matter: a comparative example of cultural collapse from south east Polynesia

8.5. Chapter conclusions

Comparison of approaches to adaptation on the North Atlantic Islands

Were outcomes on the Faroe Islands, Iceland and Greenland inevitable?

Chapter summary

Chapter 9: Conclusions: Under what circumstances do people put unsustainable demands on island environments?

Summary

Implications of site-specific research in the Faroe Islands

Implications of inter-island comparisons in the North Atlantic

Implications of the thesis for the fundamental issues of islands and human impact

Appendix A: Additional archaeological data

Sandoy archaeological structures and GPS coordinates

Appendix B: Interview data

Interview framework

Notes from interviews

Notes from interview with Gunnar Bjarnarsson (GB): 28/04/2006

Additional notes from second interview with GB: 04/05/06

Notes from interview with Joannes Johannessen (JJ): 02/05/06

Notes from interview with Johan Petur (JP): 01/05/06

Notes from interview with Petur Clementson (PC): 02/05/2006

Interview transcripts

Transcription of interview with Gunnar Bjarnarsson (GB): 28/04/2006

Transcription of interview with Joannes Johannessen (JJ): 02/05/06

Appendix C: Icelandic stratigraphic and sediment accumulation rate data

Methodological summary

Appendix D: Papers arising from the thesis
